Mean % Score	69.9%
Standard Deviation % Score	9.6%

Item (e) of Public Act 494 of 2008 requires reporting of "the correct answer rate and correlation for each test question and each test form." Due to the model used by Prometric to create each examination, many unique *forms* with equal difficulty and content are created. Additionally, because of other psychometric aspects of how the *forms* are created, Classical Testing Theory (CTT) or *fixed-form* item statistics such as the *p*-value and point-biserial correlation do not apply. Therefore, the vendor is unable to provide statistics as required in item (e).

*Data provided by Prometric, examination development and administration vendor.*
